Application Papers						
9)☐ The specification is objected to by the Examiner.						
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
11) ☐ The proposed drawing correction filed on is: a) ☐ approved b) ☐ disapproved by the Examiner.						
If approved, corrected drawings are required in reply to this Office action.						
12)☐ The oath or declaration is objected to by the Examiner.						
Priority under 35 U.S.C. §§ 119 and 120						
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).						
a) ☐ All b) ☐ Some * c) ☐ None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).* See the attached detailed Office action for a list of the certified copies not received.						
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application	n).					
 a) ☐ The translation of the foreign language provisional application has been received. 15)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Application/Control Number: 09/897,663

Art Unit: 2833

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 2. Claims 1&4 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The features "the housing having...contact-retaining portion" in lines 21-24 of claim 1 and the feature "the contact-retaining portion thick wall" in line 2 of claim 4 were not disclosed in the specification. Therefore, it is considered new matter. Applicant is required to cancel the new matter in the reply to this office action.
- 3. Claims 1 & 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 17, it is unclear how the connecting portions could connect to the circuit board since line 7 of claim 1 recites that the connecting portions being positioned at the fitting part.

- 4. Without the feature a vertical contact-retaining thick wall, the rejection stands as follows:
- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Application/Control Number: 09/897,663

Art Unit: 2833

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 1& 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kiat.

Insofar as the claims can be understood, due to the indefinite above, Kiat, Figs 1-3 show a housing 12 having a fitting part 42 for being engage able with a mating connector (not shown), a mount bottom surface 20 to be placed on a surface of a circuit board 44, a plurality of electrical contacts (54, 56) having a connecting portion 48 and another end (60, 66) to be connected to the circuit board 44, a foot portion 18 extending rearward beyond the connecting portions; a step 22 is provided between the lower surface (not labeled) of the fitting part and the mount bottom surface 20, and contact portions (not labeled) in the housing for engaging with the barbs 52 of the contacts. It would have been obvious to one with skill in the art to have the fitting part of the connector to be engaged with a matable connector by mating movement in a front and a rear direction that is parallel to the circuit board since such use is old and well know in the art.

- Applicant's arguments with respect to claims 1 & 4 have been considered but are moot in view of the new ground(s) of rejection.
- 8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 09/897,663

Page 4

Art Unit: 2833

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR

1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

will the statutory period for reply expire later than SIX MONTHS from the date of this final

action.
